The Diamond Casino Heist is Now Available in GTA Online on Xbox One. Pull off the most sophisticated and daring robbery the city of Los Santos has ever seen in The Diamond Casino Heist – now available in GTA Online . The Diamond Casino & Resort might be under the questionable management of the Duggans, the ruthless Texan petrochemical magnates who stole control from Tao Cheng and the Triads, but business is still booming. Now it's time to act on that cryptic text you received from Cheng Family Holdings. Georgina Cheng – VP of Cheng Holdings and the more poised and polished younger sister to

party boy, Tao – is on a mission to hit the Duggans where it hurts most: by breaking into the Diamond's highly secure vault and stealing everything in it. With Georgina now calling the shots, and socially awkward criminal mastermind Lester Crest and his vast network of nefarious resources ready to assist, it's time to take on an ambitious job where the security is state-of-the-art, the preparation options are near-limitless, and the take is off the charts. Cracking the Diamond. Are you ready to carry out the ultimate heist? To plan a score this big you'll need the right location, crew and gear. Fortunately for you, Lester has already sourced the perfect front. Meet up with Lester in Mirror Park, then tap into Maze Bank Foreclosures to acquire the new Arcade property. Get the operation off the ground with a facelift by stocking it with some playable retro arcade cabinets and a little help from one of Lester's family friends that's looking to break into the 'gaming' industry. There are 12 new playable games, including: Badlands Revenge II : The peaceful frontier has been invaded by marauders, road agents, thieves, and revenue men. Use your weapons wisely to rid the prairie of the desperados and outlaws that threaten your very way of life. The Wizard's Ruin : An evil wizard has kidnapped Grog and stolen him away to a terrifying fortress. Now Thog must fight through enchanted forests, ghastly swamps, labyrinths of decay and battle terrifying enemies to rescue his brother with only his mighty sword and magical engorging potions found along the way. Monkey's Paradise (Degenatron classic): This simian simulator took arcades by storm in the 80s. Swing from green dot to green dot with your red square monkey and show the world who is at the top of the food chain. Once your Arcade is up and running, the basement planning area below is where the real work begins. The Hideout houses three planning boards and provides a place to store sourced getaway vehicles and heist prep equipment, as well as areas to stage rehearsals to practice cracking vaults and hacking doors with your crew. Gathering intel and preparing comprehensive reconnaissance with your crew will be crucial. As you take on preparatory missions you'll have the option to go the extra mile by documenting various entry points, destroying supply shipments and gathering intel on security systems from an old associate and former Casino employee, all of which will reward you with more routes, approaches and options like getaway decoys when it comes to the big show. You also need to make sure you have the right people at your disposal. Through Lester's nefarious network of contacts you can hire support team members: bringing on the right driver, gunman and hacker are key – for the right price you'll be able to hire some serious experts depending on how well connected you already are. The Diamond Casino Heist gives you three distinct approaches to initially choose from, with multiple ways to execute your chosen approach. Choose Silent & Sneaky to enter undetected and try to make off with the haul before they even know what hit them. Engage in deception by going The Big Con route and masquerading as maintenance staff, pest control or other contractors. Or opt to go in guns blazing with the Aggressive approach – just be prepared to be met with increased resistance. For each approach, you'll have a series of choices for how you want to complete every step of the Heist. And if at any time your attempts at stealth or subterfuge somehow fail, you will still be able to complete the mission by dealing with any changing scenarios and pushing through to the end with your last remaining lives.
