Note: Flash is a bit outdated multimedia software platform which was (and still is) used to produce animations, games, web applications and much more. That makes it great for creating online casino games, but it has many disadvantages, which is why it's being replaced by newer technologies like HTML5 . If you are accessing the Casino.guru website using a mobile device or a computer without Flash Player installed, the "Mobile Devices Supported" filter will be extremely useful to you. Use it to display only the casino games you can play without Flash. Free slot casino games available only to players from certain countries. If that happens, you can still choose from a wide selection of other games which you will be able to play for free. Note: Your inability to play a game for fun can also be caused by the fact that you don't have the Flash Player installed for a game which requires it. How to play online casino games for real money. Playing slots and casino games in our free game section is very simple. You don't need to download or install anything. Simply browse the list of games or use the search function to select the game you want to play, tap it, and the game will load for you, ready to be played. Then, simply press spin if you are playing slots, place a bet and start the game round in table games. Is it possible to win real money in free casino games? No, it is not. Free casino games are basically the same games that you can play in real-money online casinos, but without real money involved. When you load any of the game, you are given a certain amount of virtual currency, which doesn't have any real value. You can then play and increase your balance; however, you can never cash out the credits you accumulate in the game. If you want to play for free with a chance to win real money, we suggest checking out our list of no deposit bonuses, which contains free cash and free spin bonus offers, which can be obtained by creating a new casino account and can be turned into a real-money cashout. Can I play free casino games on a phone or tablet? Yes, you can. Most games in our database are created using mobile-friendly HTML5 technology, which enables the games to be played basically on any device with a modern browser, including mobile phones (both iPhone and Android) and tablets. If you want to make sure that you are browsing just mobile-friendly games, use the 'Mobile Devices Supported' filter in the Casino Guru free games section. Do I have to download something to be able to play? No, you don't have to download anything. All games in our database are browser-based and don't require any download or installation. That said, some older games require Flash player, so you might have to install it if you want to play some of these games and don't have Flash installed on your computer yet. If you are using a mobile device, you will not have to install anything, as Flash player is not available for mobile devices at all. What types of casino games are available? Our database of free casino games contains slot machines, roulette, blackjack, baccarat, craps, bingo, keno, online scratch cards, video poker and other types of games. The vast majority of games are slots, which makes sense, as slots are by far the most popular type of online casino games. Free roulette is also quite popular. What game providers can I find on Casino Guru? Our database contains pretty much all popular casino game providers. You can play games from the most popular game providers, such as NetEnt, Playtech, Microgaming, Big Time Gaming, Novomatic, and so on, but also titles from less-known local providers like Kajot, EGT, or Amatic. Basically, if games from a certain game provider can be played for free, we almost certainly have them in our database. You can apply filters or use the search function to find what you are looking for. Do free games work the same as in real-money games? The vast majority of free casino games and slots behave exactly the same as their real-money counterparts at real money slots sites. They have the same symbols on the reels, the same payout table, and work identically. This is very important for players, because free games can be used to try out games before playing them for real money, and if they worked differently, it would be misleading. There are some exceptions, though. Some game providers allow casinos to choose from multiple versions of the same game, each with a different RTP. This means that the game you play for real money can theoretically have a lower RTP than the free version. This doesn't apply to all game providers, but it's definitely worth pointing out. We suggest checking the RTP in your selected online casino just to make sure.
